

Week 2 Day 5 Release Checklist

Image

- ☐ Dockerfile uses a specific base image tag.
- ☐ Build context excludes secrets and irrelevant files.
- ☐ Image has a local tag.
- ☐ Image can run from a clean container.

Runtime

- ☐ Host port is documented.
- ☐ HTTP status is checked.
- ☐ Body marker is checked.
- ☐ Logs can be inspected.
- ☐ Cleanup is documented.

Security

- ☐ No .env file is copied.
- ☐ No personal token, password, MFA code, SSH key, or cloud credential is present.
- ☐ Public push is not performed without explicit approval.

Handoff

- ☐ README includes build, run, check, stop, cleanup.
- ☐ Failure note includes symptom, suspected cause, fix, recheck.
- ☐ Day 3 readiness note mentions Docker-to-MSA transition.
