

Architecture 01: Web + PostgreSQL

```
docker compose config
docker compose up -d
docker compose ps
curl -I http://localhost:18085
docker compose exec db psql -U postgres -d app -c "SELECT current_database();"
docker compose logs --tail 80
docker compose down
```

docker compose down -v는 pgdata volume까지 삭제한다. 실습 DB를 초기화할 때만 사용한다.
