

Architecture 04: Nginx Reverse Proxy + Multiple Web Services

```
docker compose config
docker compose up -d
docker compose ps
curl -s http://localhost:18089/a/
curl -s http://localhost:18089/b/
docker compose logs --tail 80
docker compose down
```

web-a와 web-b는 host port를 직접 공개하지 않는다. 외부 접근은 proxy service의 host port 18089로만 들어온다.
